***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-19, drawn to a method for manufacturing and placing labels in a mold.

Group II, claim(s) 20-26, drawn to a method for injection molding.

Group III, claim(s) 27-38, drawn to an apparatus for manufacturing labels for placement in a mold.

Group IV, claim(s) 39-42, drawn to a mold.

Group V, claim(s) 43 and 44, drawn to an injection mold product.

2. The inventions listed as Groups I, II, III, IV and V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the technical feature of a retaining element being applied to the second side in Group I is not present in Groups II, III, IV or V and the technical feature of filing the cavity in Group II is not present in Group I, the technical feature of locking the label-forming part against the carrier present in Group III is not present in Group I, the technical feature of a cavity in Group IV is not present in Group I and the technical feature of a label with a thickness of less than 30 micrometers in Group V is not present in Group I. Furthermore the technical feature of moving the engaging parts such that the product is rendered clear in Group II is not present in Groups III, IV or V and the technical feature of locking the label-forming part against the carrier present in Group III is not present in Group II, the technical feature of a removal device in Group IV is not present in Group II and the technical feature of a label with a thickness of less than 30 micrometers in Group V is not present in Group II. Still furthermore the technical feature of locking the label-forming part against the carrier present in Group III is not present in Groups IV and V, and the technical feature of a removal device in Group IV is not present in Group III and the technical feature of a label with a thickness of less than 30 micrometers in Group V

Art Unit: 3726

is not present in Group III. Finally the technical feature of a removal device in Group IV is not present in Group V and the technical feature of a label with a thickness of less than 30 micrometers in Group V is not present in Group IV.

3. A telephone call was made to Mr. Justin Holmes on February 13, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Essama Omgba whose telephone number is (703) 305-2915. The examiner can normally be reached on M-F (10-7:30) First Friday off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Peter Vo can be reached on (703) 308-1789. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
